Towering over the hardstanding area at Barcelona's MB92 shipyard, is PINMAR'S vast new purpose-built paint shed. This impressive structure, built in partnership with MB92, extends the original to a length of 125 metres, with 25 metres width and 27.5 metres height, making it the largest of its kind in the Mediterranean.

This, combined with a new extraction and filtration system, opens the opportunity for more yachts to be refinished under ideal controlled climatic conditions.

Remy Millott, Managing Director said, "This facility is an important part of Pinmar's investment strategy ensuring our continued position as Europe's leading yacht finishing company."
